

Comparing EBSCOhost to Free Internet Search

EBSCOhost databases are the most-used, premium online information resources for tens of thousands of institutions worldwide, representing millions of end-users.

Feature	Resources offered by EBSCOhost	Resources offered by Free Internet Search
Exclusive Access	EBSCOhost databases are purchased by academic institutions for use by students and faculty.	Free to anyone with Internet access.
Database Content	High-quality articles and materials licensed from reputable publishers , recognized by library professionals, and selected for use in an academic environment.	Does not have the best sources from the most famous and respected publishers because of copyright laws.
Reliable Information	Articles are evaluated by publishers and experts for accuracy before they're approved for inclusion in an EBSCOhost database.	Anyone can publish inaccurate information to the web whenever they want.
Unfiltered Results	EBSCOhost results are not filtered by user behavior or geographic location.	Subtle filtering isolates researchers from new discoveries and insights that may fall outside of their usual tastes and interests.
Personal Information	EBSCOhost doesn't ask for or require personal information to access EBSCOhost databases.	Many sites, which aren't always safe, ask for personal information.
Article Summaries	Article Summaries aid researchers to quickly assess information.	No similar feature available.
Citation & Bibliographic Assistance	Students can view, save, print and e-mail citations for chosen article(s) in many different formats, directly from the database.	No similar feature available.
Ability to Narrow Results	EBSCOhost databases feature limiters to assist in narrowing your results making the information you need easier to find.	Free search engines do not allow users to limit searches to full text, articles with images, etc. Harder to find relevant information.
Clustered Results	Helps narrow the results list by subject, journal, author, publication, date , and more.	No similar feature available.
Ability to Save Searches	Save search results in a password-protected folder, offering a secure and organized holding area.	No similar feature available.
Advertisements	No ads or popup windows. No angles. Just information to match academic needs.	Most content is ad-sponsored. Ads are distracting, often misleading, and can be explicit.
