Overview

You can now download ebooks through ebrary on the Murray Library website! Ebrary is a library collection of ebooks from academic publishers. It currently contains approximately 75,000 ebooks. Books from ebrary can be download in one of two formats, depending on how much of the book you wish to download.

1. Download a specific chapter or page range (up to 60 pages)

- An ebrary account is required.
- A simple pdf is created. You can treat this just like any other pdf file.
- Downloadable on most computers and ereader devices, *including Kindle*.
- Additional software is not required.
- No document limit.
- No time limit. You may keep the pdf permanently, as they do not expire.
- No concurrent user limit (unless set by the publisher).

2. Download an entire book

- An ebrary account is required.
- Adobe account and Adobe Digital Editions software is required (software required only if you download books to your laptop).
- A pdf with digital rights management file is created.
- Accessible on many computers and ereaders; *it does not work with Kindle*.
- Limit of 10 books at a time.
- Check-out period is 14 days, managed by Adobe Digital Editions. You may return a book early.
- No concurrent user limit (unless set by the publisher). Others can still access and download the book through ebrary after you download the book.
- Not all books may be downloaded. This is determined by licensing agreements with individual publishers.

Download ebook directly from ebrary to your ipad

You must first have an ebrary and Adobe account, and the Ebrary Reader app, (or the BlueFire Reader app) installed on your ipad.

Create ebrary account

Through the Safari webbrowser, go to ebrary (ebooks). Create an ebrary account using the Sign In link in the upper right corner, and then selecting Create an account.

Create Adobe Account

Go to the Adobe website and create an account.

https://www.adobe.com/cfusion/membership/index.cfm?nf=1&loc=en_us&nl=1&view=s&nMemCommPrefs&tab=communications

Note that in addition to basic account information, you will need to create a unique screenname (you can try firstlast name or combo of name with numbers). You will also be required to enter some demographic information about where you work.

Download ebrary app

1. Download the free ebrary app from the App store to the ipad.

2. Open ebrary app, and skip introductory screen about setting up accounts.
3. Select Settings icon.
4. Sign in with ebrary account
5. Authorize ipad with Adobe account.
6. You may now search for and download ebooks.

Search for and download books from Messiah ebrary collection to your ipad

Option 1: Through the ebrary app

Open the ebrary app. Select the online search icon. Search for books based on keyword, subject, title, or author. Open book. Select the download button. After the book downloads to your ipad, select the information icon to see how long the book will stay on your ipad.

Option 2: Through a web browser (see instructions in below pages for screenshots)

Open the Safari web browser. Go to the library and search for books in either the library catalog or ebrary database. Select the download button. Select the option to download the entire book. (You may be prompted to sign in with your ebrary and/or Adobe accounts through the web browser; just follow the screen instructions). Select ebrary when asked to which ereader you wish to download the book (You may also download ebooks to the BlueFire Reader app). The book will download directly to your app.

Please note that if you download books from ebrary to different readers/laptops, you may not have a complete list of all books checked out to you. You are limited to 10 books at any one time. You will need to track what books you have checked out if you are close to the limit. Keep in mind that books expire from your reader when the loan period finishes (no overdue fines!), and that you can always return books early if you need to check out more.

Download a Book Chapter or Page Range to your laptop

1. Go to ebrary through the library homepage

E-Books

Ebrary

- Publication dates: mostly 2004 - present.
- Access: Web access (see below)
- Description: An ebook collection of nearly 70,000 titles.
- **Campus users click [here](#) for access:**
- **Off-campus access (Messiah College students, faculty, staff only), click [here](#)**

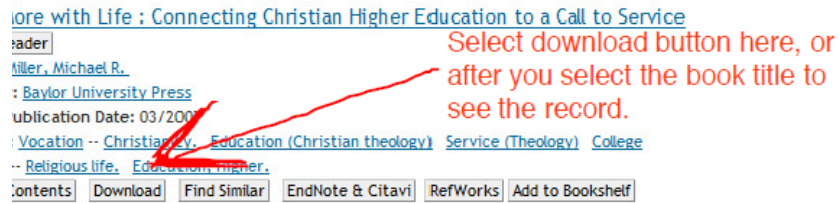

PsycBooks

You don't need to be on campus!

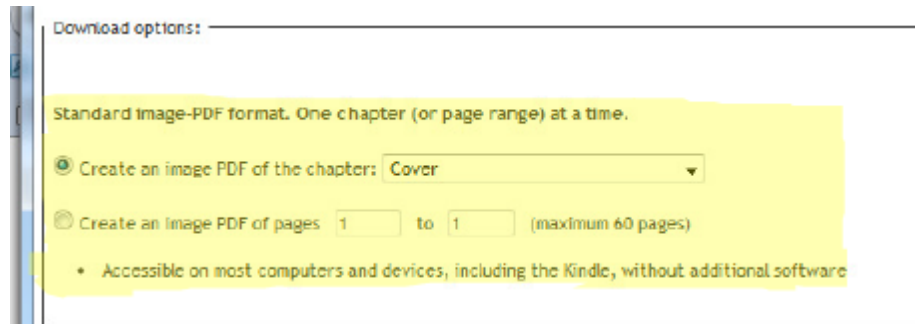

2. Create an ebrary account, or sign into ebrary if you already have an account, using the Sign In link in the upper right corner.

3. Search for books relevant to your research topic. Locate books.
4. Select the download option from the book list, or from the book record.

5. Select “Create an Image pdf of the current Chapter” and select chapter name from the drop list, or select “Create an Image pdf of Pages”, and enter page number range (up to 60 pages).

6. When prompted, select destination folder to save pdf.
7. Access pdf through computer or most ereaders based on file location.

Download an Entire Book to your laptop (first time)

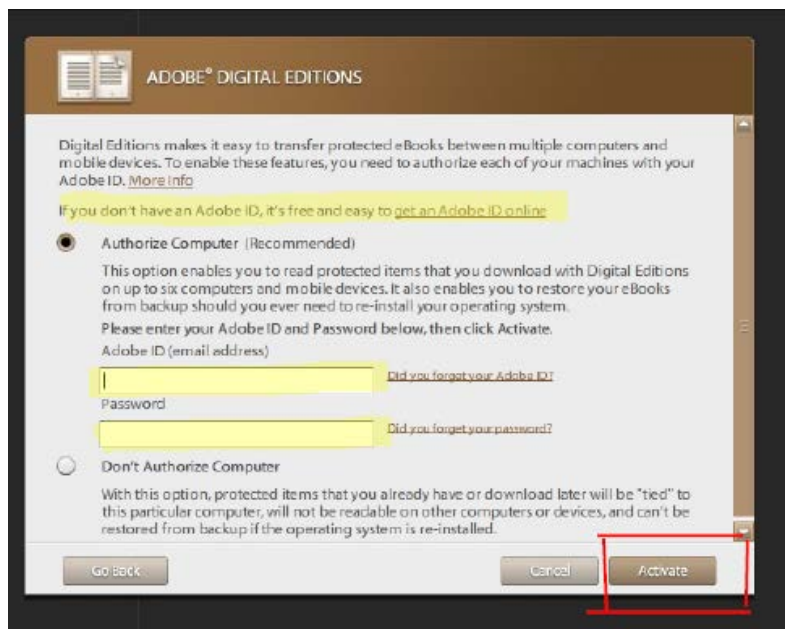

1. Download Adobe Digital Editions to your computer.

Please note: Download Adobe Digital Editions to a personal computer only. Because this process involves downloading a software program to a computer with your account information, it is not feasible to download this software or ebooks to a public computer such as those in computer labs on campus. Instead, you must use a personal computer or mobile device to do this.

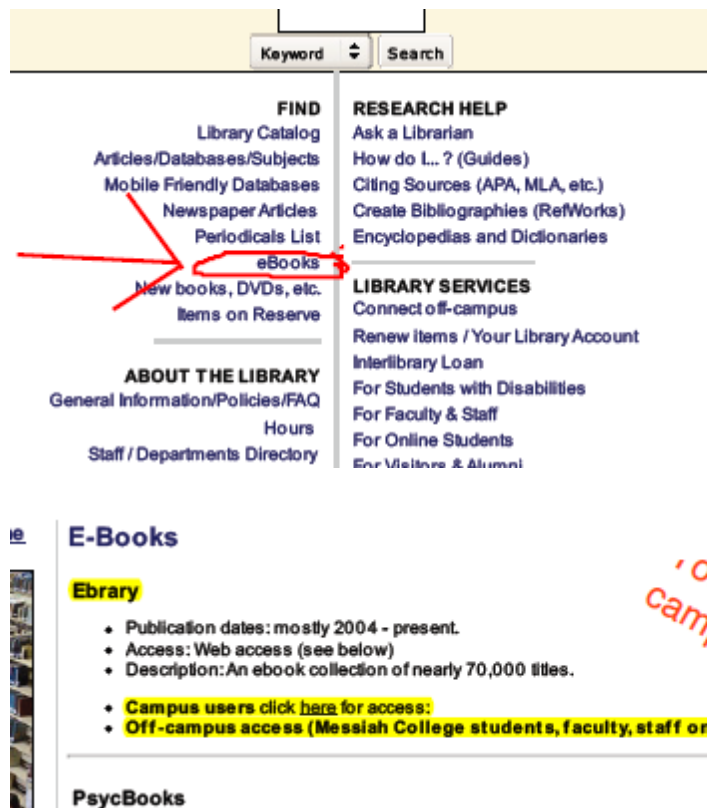

Go to Adobe Digital Editions webpage,
<http://www.adobe.com/products/digitaleditions/>, and select the “Install” button.

2. Go through the Adobe Digital Editions SetUp Assistant Wizard

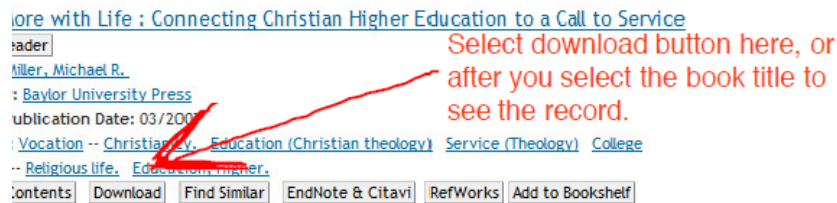

3. Create an Adobe account through the account link. Or sign in to an existing Adobe account if you already have one. You can also create an Adobe account through this direct link: <https://www.adobe.com/cfusion/membership/>
4. Sign in to Adobe Digital Editions, and Activate the software. This will authorize Adobe Digital Editions to run on your computer. You may authorize up to six devices at a time with your Adobe ID. (Adobe Digital Editions also works with many other ebook systems, so you may wish to use it for personal books through public library systems as well).
5. Go to ebrary through the library homepage

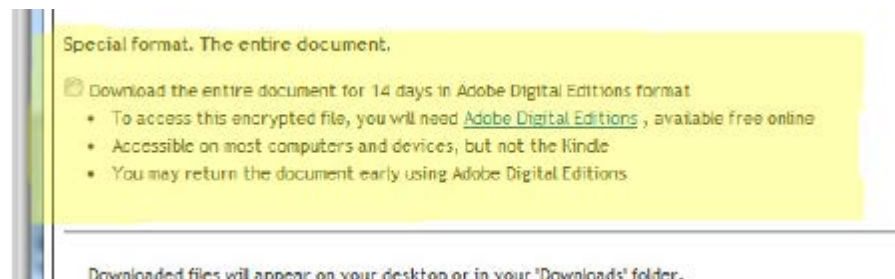

6. Create an account, or sign into ebrary if you already have an account, using the Sign In link in the upper right corner.

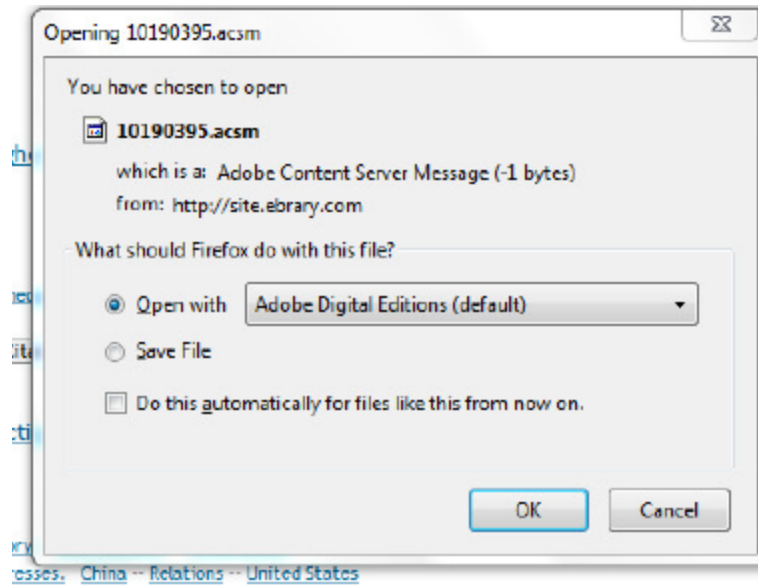

7. Search for books relevant to your research topic. Locate books.
8. Select the download option from the book list, or from the book record.

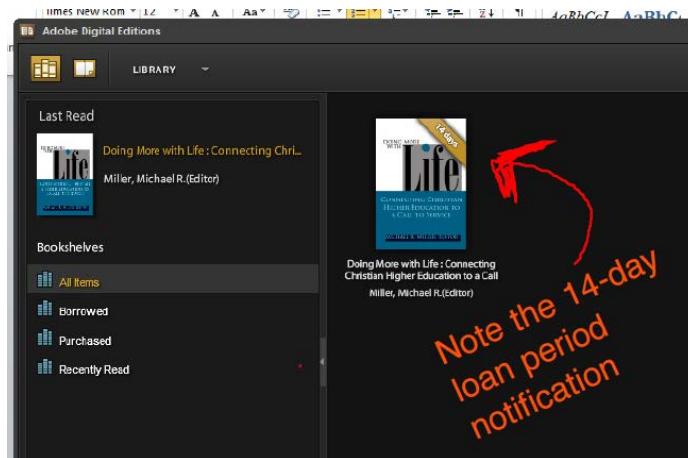

9. Select "Download the Entire Document". Choose to open the document with Adobe Digital Editions.

10. The book will open in the Adobe Digital Editions software. When you view the library of all books in ADE, a notification will appear on the front cover indicating the number of days you have left on the book loan before it is automatically returned.

11. You can now open the book or transfer it to another ereader. The file is a pdf file in the “Documents/My Digital Editions” folder on your computer.

Download an Entire Book to your laptop (subsequent books)

The good news..... you've already done the hard part by downloading Adobe Digital Editions, creating an Adobe account, and creating an ebrary account! You only need to do that once.

To download subsequent books, simply sign in to ebrary, find and select your books, and download them. You will be prompted to open the book in Adobe Digital Editions, and you are done.

Please note that you will need to download ebooks to a personal computer that already has your Adobe Digital Editions software downloaded and account activated. You cannot download ebooks to a public computer in the campus computer labs.

Transfer downloaded book from laptop to ereader or ipad

Transfer ebook to ereader

In many cases, you can transfer a book from Adobe Digital Editions to a supported ereader through a USB or wireless connection. For more information on supported ereader devices and how to transfer books to them, go here.

<http://blogs.adobe.com/digitalpublishing/supported-devices>

See next page for instruction on transferring ebooks to the ipad.

Transfer ebook from laptop to ipad (using itunes)

Note: itunes and Adobe Digital Editions software should be located on the same personal computer to transfer books.

1. Download either the Ebrary app, or the BlueFire Reader app from the itunes app store to your ipad. Both apps are free.
 - a. While other readers such as ibooks will often work with *purchased* books from Adobe Digital Editions, Ebrary, and BlueFire Reader are currently the only apps that work with *borrowed* books from libraries in Adobe Digital Editions.
2. Connect your ipad to your computer and open your itunes account.
 - a. Select your ipad device in the left panel.
 - b. Select the **Apps** tab, and scroll down to select **File Sharing**.
 - c. Select either Ebrary or BlueFire Reader, whichever app you choose to use. Select the Add Button.
 - d. Browse to My Digital Editions folder (often under Document folder), and select the pdf file of the ebook you wish to transfer.
 - e. Resync your ipad.
